Cam 10 – Test 1

I. IELTS READING: Types of questions

1. Multiple choice
2. True/False/Not given OR Yes/No/Not given
3. Note/Table/Flow-chart/ Diagram Completion
4. Sentence completion
5. Summary completion
6. Matching features
7. Matching information
8. Matching headings
9. Short answer

II. STRATEGIES

1. TRUE/FASLE/NOT GIVEN – YES/NO/NOT GIVEN

a. TRUE/FALSE/NOT GIVEN

Based on the information provided in the passage, you will choose between True/False/Not Given for each statement.

- True: The statement matches the information in the passage.
- False: The statement contradicts the information in the passage.
- Not Given: The information is not mentioned at all in the passage.

b. YES/NO/NOT GIVEN

Based on the information provided in the passage, you will choose between Yes/No/Not Given to evaluate whether the statements match the <u>writer's opinion or views.</u>

- Yes: The statement agrees with the writer's opinion/view.
- No: The statement contradicts the writer's opinion/view.
- Not Given: The writer's opinion/view is not stated.

Steps to do the task

STEP 1: Carefully read the question and underline the key ideas

Skim through each statement and underline or highlight the keywords in it, focusing on the main information. Keywords are important words that carry the central meaning of the sentence. They can be factual and straightforward (such as proper nouns, places, or numbers), or words that help you understand the main point (nouns, verbs, adjectives, etc.).

STEP 2: Scan/Skim the passage to locate the keywords

Once you have highlighted the keywords and important details, look at the passage and scan for the same words or synonyms.

STEP 3: Compare the statement with the passage and decide on True/False/Not Given

TIPS:

In True/False/Not Given tasks, the questions usually follow the order of the passage. For example, the clue for Question 2 often comes after the clue for Question 1. If no clue is found, check the section between the clues for the previous and next questions.

2. SHORT ANSWER QUESTION

Short Answer Question: This task requires candidates to answer questions using words or phrases taken directly from the passage, within a word/number limit. It is similar to gap-filling tasks.

Questions 1 – 4

Answer the questions below.

Choose ***NO MORE THAN THREE WORDS AND/OR A NUMBER*** *from the text for each answer.*

Write your answers in boxes 1-4 on your answer sheet.

1 What is the African rhinoceros compared to?

2 Which type of rhino fell in number to below a hundred?

3 What percentage of black rhinos had been illegally killed by 1992?

4 How have the criminals improved their success?

Steps to do the task

STEP 1: Read the instructions carefully → check the word/number limit, identify keywords and the main idea of the question.

STEP 2: Use scanning to find parts of the text related to the keywords.

STEP 3: Choose the correct word(s) from the passage → make sure the answer fits the word/number limit.

TIPS:

- Focus on one question at a time instead of underlining all keywords at once.
- Questions usually follow the order of the passage, so the clue for each question often appears after the previous one.

3. NOTE/FORM/TABLE COMPLETION

This task type appears in two forms: short-answer questions and multiple choice.

- Short-answer question: requires finding information in the passage and filling in the blanks.
  (In this form, you must carefully check the exact word and number limit required for each blank.)
- Multiple choice: requires selecting the correct answer from a list of options to fill in the blanks and complete the notes, tables, flow-charts, or diagrams.

Steps to do the task:

STEP 1: Read the instructions and identify keywords and the content of the section with blanks.

1. Check the exact number of words/numbers allowed.
2. Identify the main content of the notes/table/flow-chart/diagram.
   - Check the title: If the task has a title, read it first to understand the main idea. For Note Completion, also check the subheadings.
   - Check the first column and the top row: For Table Completion, read them to know which part of the passage the table refers to.
3. Identify the missing information by focusing on the keywords and the text around the blank. Carefully read before and after the blank to ensure the answer fits grammatically.

STEP 2: Locate the related section in the passage and find clues for the answer.

1. Use **scanning** to locate the relevant part of the passage (based on the title or subheadings of the notes/table/flow-chart/diagram).
2. Look for either the exact keywords or their paraphrases to identify clues for the answer.

STEP 3: Choose the correct answer and check accuracy.

1. Select the word/phrase that best fits the blank.
2. Make sure the answer follows the word/number limit and is grammatically correct.

TIPS

- Although most blanks in Note/Table/Flow-chart/Diagram Completion require **nouns**, sometimes the answers can be **verbs or adjectives**.
  If the answer is a verb, check the tense and singular/plural form carefully.
- For the multiple-choice format, make sure you have transferred the correct option onto the answer sheet.

III. VOCABULARY

No.	Vocabulary	Phonetic	POS	Meaning
1	millennium	/mɪˈlen.i.əm/	n	thiên niên kỷ
2	stepwell	/ˈstɛp.wel/	n	giếng bậc thang
3	fundamental	/ˌfʌn.dəˈmen.təl/	adj	cơ bản, thiết yếu
4	neglected	/nɪˈglek.tɪd/	adj	bị bỏ mặc
5	restoration	/ˌres.təˈreɪ.ʃən/	n	sự trùng tu
6	former	/ˈfɔː.mə(r)/	adj	trước kia
7	glory	/ˈglɔː.ri/	n	thời huy hoàng
8	document	/ˈdɒk.jʊ.ment/	v	ghi/chụp lại
9	spectacular	/spekˈtæk.jʊ.lə(r)/	adj	ngoạn mục
10	monument	/ˈmɒn.jʊ.mənt/	n	di tích/công trình
11	unique	/juːˈniːk/	adj	độc nhất
12	region	/ˈriː.dʒən/	n	vùng
13	architecturally	/ˌɑː.kɪˈtek.tʃər.əl.i/	adv	về mặt kiến trúc
14	complex	/ˈkɒm.pleks/	adj	phức tạp
15	heyday	/ˈheɪ.deɪ/	n	thời kỳ đỉnh cao
16	gather	/ˈgæð.ə(r)/	v	tụ họp
17	worship	/ˈwɜː.ʃɪp/	v	thờ cúng
18	villager	/ˈvɪl.ɪ.dʒə(r)/	n	dân làng
19	caste	/kɑːst/	n	giai cấp (theo đạo Hindu)
20	dotted	/ˈdɒt.ɪd/	adj	rải rác
21	desert	/ˈdez.ət/	n	sa mạc
22	position	/pəˈzɪʃ.ən/	v	đặt, bố trí
23	comprise of	/kəmˈpraɪz ɒv/	v phr	bao gồm
24	descend	/dɪˈsend/	v	đi xuống
25	ground level	/graʊnd ˈlev.əl/	n	mặt đất
26	aquifer	/ˈæk.wɪ.fə(r)/	n	tầng chứa nước
27	recede	/rɪˈsiːd/	v	rút xuống
28	negotiate	/nəˈgəʊ.ʃi.eɪt/	v	vượt qua (bậc/lối)

29	crater	/ˈkreɪ.tə(r)/	n	hố lớn
30	paving	/ˈpeɪ.vɪŋ/	n	lát đá
31	sloping	/ˈsləʊ.pɪŋ/	adj	dốc nghiêng

97	take place	/teɪk pleɪs/	v phr	diễn ra

IV. PRACTICE

READING PASSAGE 1

Stepwells

A millennium ago, stepwells were fundamental to life in the driest parts of India. Although many have been neglected, recent restoration has returned them to their former glory. Richard Cox travelled to north-western India to document these spectacular monuments from a bygone era.

During the sixth and seventh centuries, the inhabitants of the modern-day states of Gujarat and Rajasthan in North-western India developed a method of gaining access to clean, fresh groundwater during the dry season for drinking, bathing, watering animals and irrigation. However, the significance of this invention – the stepwell – goes beyond its utilitarian application.

Unique to the region, stepwells are often architecturally complex and vary widely in size and shape. During their heyday, they were places of gathering, of leisure, of relaxation and of worship for villagers of all but the lowest castes. Most stepwells are found dotted around the desert areas of Gujarat (where they are called *vav*) and Rajasthan (where they are known as *baori*), while a few also survive in Delhi. Some were located in or near villages as public spaces for the community; others were positioned beside roads as resting places for travellers.

As their name suggests, stepwells comprise a series of stone steps descending from ground level to the water source (normally an underground aquifer) as it recedes following the rains. When the water level was high, the user needed only to descend a few steps to reach it; when it was low, several levels would have to be negotiated.

Some wells are vast, open craters with hundreds of steps paving each sloping side, often in tiers. Others are more elaborate, with long stepped passages leading to the water via several storeys. Built from stone and supported by pillars, they also included pavilions that sheltered visitors from the relentless heat. But perhaps the most impressive features are the intricate decorative sculptures that embellish many stepwells, showing activities from fighting and dancing to everyday acts such as women combing their hair and churning butter.

Down the centuries, thousands of wells were constructed throughout northwestern India, but the majority have now fallen into disuse; many are derelict and dry, as groundwater has been diverted for industrial use and the wells no longer reach the water table. Their condition hasn't been helped by recent dry spells: southern Rajasthan suffered an eight-year drought between 1996 and 2004.

However, some important sites in Gujarat have recently undergone major restoration, and the state government announced in June last year that it plans to restore the stepwells throughout the state.

In Patan, the state's ancient capital, the stepwell of *Rani Ki Vav* (Queen's Stepwell) is perhaps the finest current example. It was built by Queen Udayamati during the late 11th century, but became silted up following a flood during the 13th century. But the Archaeological Survey of India began restoring it in the 1960s, and today it's in pristine condition. At 65 metres long, 20 metres wide and 27 metres deep, *Rani Ki Vav* features 500 distinct sculptures carved into niches throughout the monument, depicting gods such as Vishnu and Parvati in various incarnations. Incredibly, in January 2001, this ancient structure survived a devastating earthquake that measured 7.6 on the Richter scale.

Another example is the *Surya Kund* in Modhera, northern Gujarat, next to the Sun Temple, built by King Bhima I in 1026 to honour the sun god Surya. It's actually a tank (*kund* means reservoir or pond) rather than a well, but displays the hallmarks of stepwell architecture, including four sides of steps that descend to the bottom in a stunning geometrical formation. The terraces house 108 small, intricately carved shrines between the sets of steps.

Rajasthan also has a wealth of wells. The ancient city of Bundi, 200 kilometres south of Jaipur, is renowned for its architecture, including its stepwells. One of the larger examples is *Raniji Ki Baori*, which was built by the queen of the region, Nathavatji, in 1699. At 46 metres deep, 20 metres wide and 40 metres long, the intricately carved monument is one of 21 *baoris* commissioned in the Bundi area by Nathavatji.

In the old ruined town of Abhaneri, about 95 kilometres east of Jaipur, is *Chand Baori*, one of India's oldest and deepest wells; aesthetically, it's perhaps one of the most dramatic. Built in around 850 AD next to the temple of Harshat Mata, the baori comprises hundreds of zigzagging steps that run along three of its sides, steeply descending 11 storeys, resulting in a striking geometric pattern when seen from afar. On the fourth side, covered verandas supported by ornate pillars overlook the steps.

Still in public use is *Neemrana Ki Baori*, located just off the Jaipur–Dehli highway. Constructed in around 1700, it's nine storeys deep, with the last two levels underwater. At ground level, there are 86 colonnaded openings from where the visitor descends 170 steps to the deepest water source.

Today, following years of neglect, many of these monuments to medieval engineering have been saved by the Archaeological Survey of India, which has recognised the importance of preserving them as part of the country's rich history. Tourists flock to wells in far-flung corners of northwestern India to gaze in wonder at these architectural marvels from 1,000 years ago, which serve as a reminder of both the ingenuity and artistry of ancient civilisations and of the value of water to human existence.

Questions 1–5

Do the following statements agree with the information given in Reading Passage 1?

Buy bestselling books online

*In boxes **1–5** on your answer sheet, write*

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this

1 Examples of ancient stepwells can be found all over the world.

2 Stepwells had a range of functions, in addition to those related to water collection.

3 The few existing stepwells in Delhi are more attractive than those found elsewhere.

4 It took workers many years to build the stone steps characteristic of stepwells.

5 The number of steps above the water level in a stepwell altered during the course of a year.

Questions 6–8

Answer the questions below.

Choose **ONE WORD ONLY** from the passage for each answer.

*Write your answers in boxes **6–8** on your answer sheet.*

6 Which part of some stepwells provided shade for people?

7 What type of serious climatic event, which took place in southern Rajasthan, is mentioned in the article?

8 Who are frequent visitors to stepwells nowadays?

Questions 9-13

Complete the table below

Choose **ONE WORD AND/OR A NUMBER** from the passage for each answer.

*Write your answers in boxes **9-13** on your answer sheet.*

Stepwells	**Date**	**Features**	**Other notes**
Rani Ki Vav	Late 11th century	As many as 500 sculptures decorate the monument	Restored in the 1990s Excellent condition, despite the **9**..... of 2001.
Surya Kund	1026	Steps on the **10**..... produce a geometric pattern Carved shrines.	Looks more like a **11**..... than a well.
Raniji Ki Baori	1699	Intricately carved monument	One of 21 *baoris* in the area commissioned by Queen Nathavatji
Chand Baori	850 AD	Steps take you down 11 storeys to the bottom	Old, deep and very dramatic Has **12**..... which provide a view to the steps.
Neemrana Ki Baori	1700	Has two **13**..... levels.	Used by public today
